---

## Summary

Informatics student and Fullstack & Web3 Developer with practical experience in frontend development, UI/UX design, software engineering, and blockchain development. Experienced in building responsive web applications using Next.js, React, Laravel, and REST APIs, as well as developing Solana smart contracts using Rust and the Anchor Framework. Strong understanding of user-centered design, frontend architecture, backend integration, and decentralized application development.

---

## Experience

### **Solana Smart Contract Developer** Apr 2026 – Present

*Z4 Foundation — Remote*

- Developed Solana smart contracts using Rust and the Anchor Framework.
- Built secure on-chain instructions, account constraints, and Program Derived Address (PDA) structures.
- Implemented business logic and transaction workflows for decentralized applications.
- Wrote and executed smart contract tests while debugging protocol functionality.
- Integrated Solana programs with client applications using Anchor IDL and Solana Web3 tooling.
- Optimized compute unit usage and transaction execution efficiency.

### **Frontend Developer** Dec 2025 – Feb 2026

*PKUMI — Jakarta Pusat*

- Engineered and maintained frontend interfaces for an admission management platform.
- Built responsive applications using Next.js, React, and REST APIs.
- Developed registration workflows and user-facing application features.
- Improved usability through responsive design, optimized rendering, and efficient frontend architecture.
- Integrated frontend functionality with backend services and APIs.

### **Mentor UI/UX Design** Jan 2026 – Feb 2026

*Google Developer Group on Campus — UIN Jakarta*

- Mentored students in UI/UX design, design thinking, wireframing, prototyping, and usability testing.
- Conducted design review sessions and provided feedback on user-centered digital products.
- Facilitated workshops focused on modern UI/UX practices and industry standards.

## **UI/UX Designer** Mar 2025 – Oct 2025

*CV Miftah Digital Solusi — Hybrid*

- Designed user-centered interfaces for education and logistics digital products.
- Created wireframes, high-fidelity prototypes, and design systems using Figma.
- Worked on Smart System Education, supporting digital learning and academic management.
- Contributed to a Logistics System featuring shipment tracking, warehouse management, and analytics dashboards.
- Collaborated with designers, developers, and stakeholders to align user needs with business objectives.

## **UI Designer** Mar 2024 – Jul 2025

*Lap.On — Remote*

- Designed mobile application interfaces for a sports field booking platform.
- Developed responsive UI layouts for Android and iOS using Figma.
- Designed booking flows focused on improving reservation efficiency and real-time availability.
- Collaborated with product managers and developers to improve navigation and user experience.
- Improved visual hierarchy and reduced friction across key booking workflows.

---

## **Independent & Project-Based Development**

### **Independent Fullstack & Web3 Developer** 2024 – Present

*Remote | Project-Based*

Developed and contributed to web, software, mobile, and blockchain projects across education, business management, ERP, event management, logistics, reporting systems, and decentralized applications.

- **Seedrym** — Next.js, Rust, Anchor, Solana

Developed and contributed to a decentralized application involving blockchain-based ownership and Solana smart contract integration.

[seedrym.io](https://seedrym.io)

- **Zoya Cipta Sejahtera ERP** — Next.js

Developed responsive frontend interfaces and dashboard components supporting ERP and business workflows.

[zoya-cipta-sejahtera-erp.vercel.app](https://zoya-cipta-sejahtera-erp.vercel.app)

- **SIM GAKDA Satpol PP** — Next.js

Developed frontend interfaces for a reporting and information management system.

- **IT Fest Paramadina** — Next.js

Developed a web platform supporting competition registration, participant management, and event workflows.

[itfest.paramadina.ac.id](https://itfest.paramadina.ac.id)

- **Bengkel IT** — Next.js

Developed responsive web interfaces and reusable frontend components.  
bengkel-ti.vercel.app

- **Portal PKUMI** — Next.js, Laravel

Contributed to frontend development and backend-integrated features for an organizational information portal.  
portal.pkumionline.cloud/khazanah

- **PMB PKU Istiqlal** — Next.js, Laravel

Developed frontend interfaces and registration workflows for an online student admission platform.  
pkuistiqlal.vercel.app/home

- **Gelora** — Flutter

Developed a mobile application concept for sports field booking, equipment rental, and marketplace functionality.  
github.com/Yogaprtamaa/gelora-bookapp-mobile

- **School Management Mobile** — Flutter

Developed a mobile school management application supporting multi-tenant environments and role-based access.  
github.com/Yogaprtamaa/school-management-mobile

- **BISINDO Mobile** — Flutter, Computer Vision

Developed a real-time Indonesian Sign Language detection application displaying bounding boxes, labels, confidence scores, and text translation.  
github.com/Yogaprtamaa/bisindo-mobile

---

## Education

### **Bachelor of Informatics Engineering** Sep 2025 – Present

*Paramadina University — Jakarta Timur*

Focused on software engineering, web development, and blockchain technologies. Gained practical experience building web applications with Next.js and React, developing user-centered interfaces, integrating backend services, and building Solana smart contracts using Rust and the Anchor Framework.

---

## Technical Skills

**Frontend:** Next.js • React.js • JavaScript • TypeScript • HTML • CSS • Tailwind CSS • Responsive Design

**Backend:** Laravel • PHP • REST API Integration • MySQL • PostgreSQL

**Web3 & Blockchain:** Solana • Rust • Anchor Framework • Solana Web3.js • Smart Contracts • Cross-Program Invocation (CPI) • Program Derived Addresses (PDA)

**Mobile:** Flutter • Dart

**UI/UX:** Figma • Wireframing • Prototyping • Design Systems • User Flow • Usability Testing

**Tools:** Git • GitHub • Node.js • npm • pnpm • Vercel • Postman

---

## **Languages**

English — Intermediate

Indonesian — Native

---

## **Certifications & Community**

• Mentor Weekly Class UI/UX — Google Developer Group on Campus UIN Jakarta
